

Wood Fuelled Heating Systems

Are the business, environmental and cost issues of woodfuel of interest to you?

Following study tours to Austria and Finland, and technical site visits in the UK, we are offering FREE training seminars highlighting the lessons learnt and technical knowledge gained.

Training will cover -

- The Wood Fuel Resource – how much is available?
- Modern day conversion of wood to heat
- Woodfuel processing techniques
- How you can benefit from Wood Fuel Standards
- How to develop suitable business models
