

Woodland Management for butterflies and moths: a best practice guide

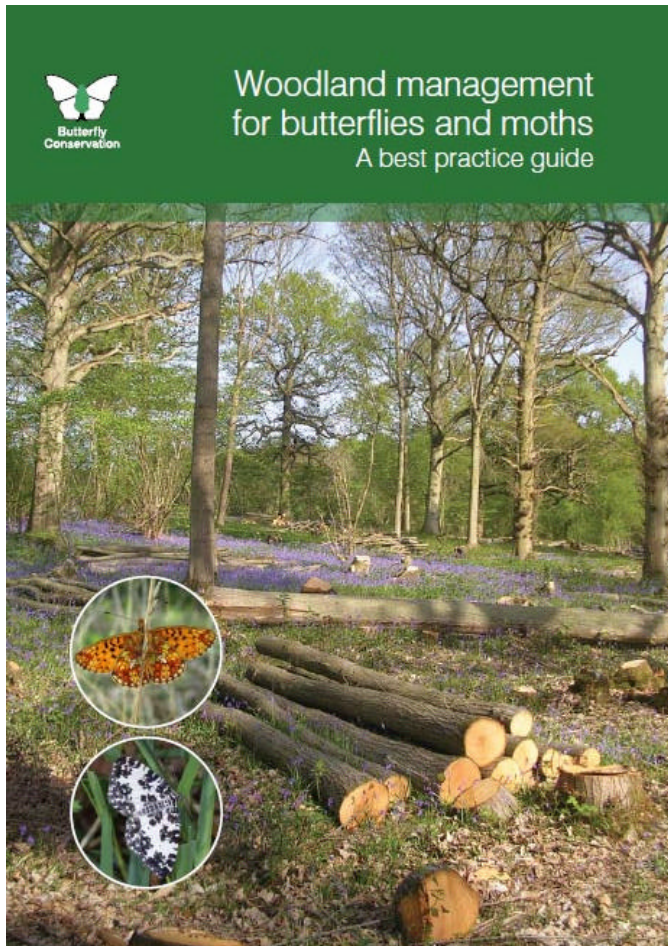

Clarke, S.A., Green, D.G., Bourn, N.A. & Hoare, D.

Published April 2011

Butterfly Conservation

Saving butterflies, moths and our environment

This new guide aims to give landowners and land management professionals the information needed to implement effective woodland management for wildlife, focusing on the requirements of woodland butterflies and moths.

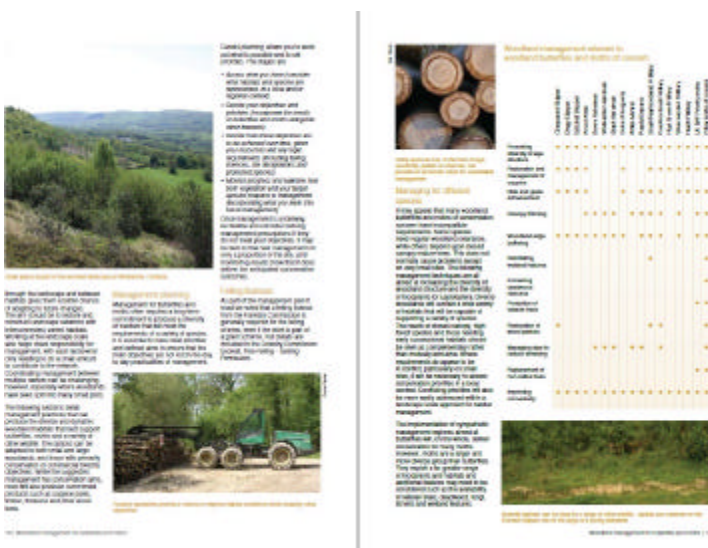

It is aimed at anyone involved in the management of woodland, and combines general principles of woodland management for wildlife with up-to-date case studies and species-specific advice for our most threatened woodland species.

Half price introductory offer
